# WORKING TOGETHER WITH GROWERS

For more than 50 years, SOPARCO has been constantly investing and innovating in order to develop and support horticulture.

Our industrial family-owned French business is built on true values: listening, proximity, expertise, service, and protection of the environment.

With a head office in France and well established in Europe, we offer cost effective and original solutions to growers worldwide.

## A tailor-made service

Our staff of over 200 works in two SOPARCO production sites (Sablons-sur-Huisne near Chartres and Chaingy near Orléans), and in several commercial subsidiaries in Spain, Germany, the Netherlands and the UK.

A 24/7 production enables SOPARCO to offer approx 600 models and 2000 references of pots, trays and plastic accessories to meet the technical, logistical and commercial requirements of nurseries and pot & bedding plant growers.

In addition to our standard range, we can adapt our productions to meet your specific needs (special colours, customization: printing, IML, labelling).

## We listen to you

Our teams listen to your requirements and take full account of your production process and logistic needs in order to offer you the best solutions.

Our field sales team and our multi-lingual sales administration work together to offer the best suitable products & service.

INNOVATION  
FOR  
*growing*

## Innovation in favour of environment

We provide you innovative solutions adapted to the evolution of the horticultural business and changing environmental awareness. We regularly invest in our industrial equipment to incorporate the very latest technological innovations and reduce the environmental impact of our production process.

We constantly seek out and secure the finest raw material quality. Our manufactured products contain more than 80% recycled material. Very sensitive to environmental protection, biodiversity and reduction of carbon emissions, we develop productions made from post-consumer (see pages 4-5) and post-industrial recycled materials and are very much involved in the implementation of the circular economy.

At SOPARCO, innovation embraces horticulture and nursery trends. Eco-design and environmental protection are at the heart of our innovations and developments.

## Quality products and logistics

We take particular care of product manufacturing and packaging. We place great importance in the selection, analysis and control of recycled materials to offer you reliable products.

Our logistics department offers optimal delivery times thanks to a high storage capacity (30,000 sq meter) and an extensive network of transport partners. The majority of our catalogue products is available from stock all year round.

**Think know-how...Think SOPARCO**

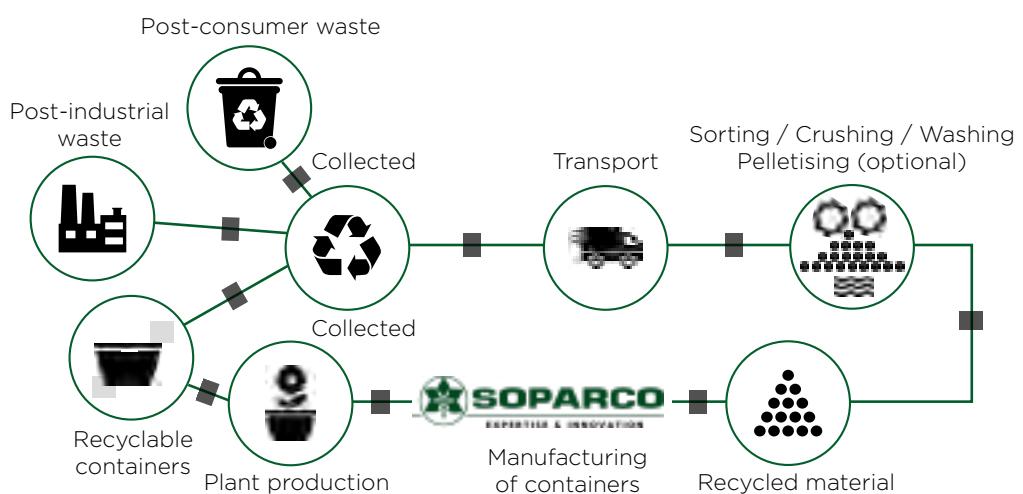

# INNOVATION AND SUSTAINABILITY

Since 1985, SOPARCO has been applying an Eco-responsible approach in every industrial process and in new product developments. Our extensive know-how both of the horticultural market and of the plastic industry enables SOPARCO to design and develop high-quality products with the minimum environmental impact: eco-design, use of recycled or bio-sourced materials, active approach towards the circular economy.

In close cooperation with national and international organizations responsible for the implementation of plastics waste recovery solutions, SOPARCO intends to demonstrate the ecological added value of plastics in a sustainable production process.

Therefore, SOPARCO products are part of a manufacturing process in line with sustainable development principles.

The majority of our pots and containers are made from 100 % post-industrial and/or post-consumer recycled polypropylene. Today, more than 80% of our materials come from recycling. Our technicians have been working for years to integrate these materials in our production process while ensuring high product quality.

SOPARCO constantly looks for technological innovations that integrate product weight, energy-consumption and packaging reductions while maintaining high technical product features.

SOPARCO systematically takes logistical aspects into account in the product conception stage in order to rationalize plant transport and reduce carbon footprint.

Our own production waste is collected and sorted in order to be recycled (oils, various packagings, papers, ink cartridges,...). We follow and control these operations.

SOPARCO works with major waste sorting actors to enhance the effective recyclability of plastics in the context of circular economy.

In France, these partnerships have resulted in the implementation of the « HORTI-ECO » system. This system is based on the recovery of used pots in order to recycle them. Please contact us for more information.

At the same time, SOPARCO cooperates with various actors to develop innovating materials and offer new generations of contents:

## Post-consumer recycled materials

Today SOPARCO is able to manufacture products made of « post-consumer » collected and sorted plastics within the framework of the circular economy. These products are available in **5 different colours**: taupe, grey, green, blue and red. In our catalogue, you'll find a selection of products manufactured with these 100% « post-consumer » materials.

They can be identified by the logo.

## Waste and by-products extracted from plant and natural sources

We are currently developing a product range partly made of mineral or plant materials extracted from nature waste (oyster or scallop shells, flaxseed husks, coffee grounds,...).

These products are 100% recyclable.

Please contact us for any demand.

## Bio-sourced and biodegradable materials

We offer bio-compostable pots mainly made of « bio-sourced » materials.

Listening to societal evolutions, SOPARCO offers « Bio » containers manufactured with « eco-friendly » materials generating low environmental impact and limited competition against food resources.

**Think green... Think SOPARCO**

**At SOPARCO, plastic has several lives, let's work together so that it becomes an eco-responsible material in everybody's eyes.**

# OUR 2019-2020 NOVELTIES

All new products for the coming year are presented on the following pages and are highlighted in orange together with our characteristic orange novelty logo in the relevant tables.

## 10 X TCM1: A NEW TRAY FOR BEDDING PLANT TRAYS

A new tray designed to facilitate handling and transport of the TCM1 vegetable tray.

Key advantages of this tray are:

- Save time during order preparation, loading and unloading of the CC trolleys.
- Possibility to combine this tray with standard large trays on a shelf
- Eco-friendly solution: this tray can be reused several times.

Logistics: 4 trays per CC shelf, i.e. 40 vegetable trays

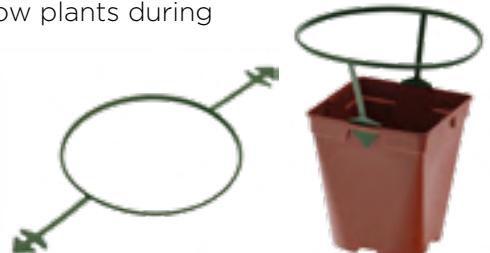

**Ref : 8789 page 23**

## SOPACLIP® 11/15CM LOW

This lower version of the Sopaclip® 11/15 2B maintains and protects low plants during cultivation and transport.

The Sopaclip® range is stored flat to save space.

**Ref : 3973 page 29**

## A GLOBAL CONCEPT: A TRAY PERMITTING TRANSPORT OF 7 X GM4

If you want to promote your plants in units of four 8x8 liners, the combination of the three following products is ideal:

- Dividable tray 2XGM4 FACP with G2 label slots
- Sopaclip® GM4 supporting plants and enabling space savings in transport. A label can be added in the slots at the same time as the Sopaclip® branch.
- 7 x GM4 tray for fast and easy loading or unloading of the CC trolleys.

This tray is reusable.

Logistics: 4 trays per CC shelf (can be combined with other large trays on a shelf), i.e. 112 liners 8x8.

The bedding plant trays and the tray can be used to grow and sell plants in soil blocks.

**Ref : 4762 page 20 (bedding tray), 8788 page 23 (tray), 3974 page 29 (Sopaclip®)**

## THE 2L VM : a new square round pot for use with bark-spreading machines

As the other VM square round pots, the 2L VM has a round base to rotate on the conveyor belt of bark-spreading machines. Its base ensures a good stability on conveyor as well as in cultivation. The well marked square top rim enables easy handling by forks. The 3-tier bottom provides perfect drainage and substrate aeration.

**Ref : 2229 pages 52-53**

## COLOURED POST-CONSUMER RECYCLED MATERIALS

SOPARCO is very much involved with public bodies to implement a virtuous circle (collection, sorting, recovery) of plastic materials and specially pots.

We offer a range of post-consumer plastic containers (10 models including 3 deco pots). Five colours are available. These recycled materials are fully recyclable.

**Ref : Deco bowls (page 73), NJ or Easy window boxes (pages 67-69), « Square Round » 0.5 L and 1 L pots (page 53).**

## A NEW « READY-TO-USE » DECO RANGE

Aesthetic and practical, both « Cameleon » and « Multy » ranges provide trendy patterns and shapes to grow and promote plants.

These « ready-to-use » deco containers are a new marketing solution to enhance your productions (See page 59).

Please contact us for any demand.

## How to store our products

### PP and PS :

- Two box-pallets maximum can be stored on top of one another.
- Keep the boxes in a dry environment.
- Do not store plastic containers near a heat source
- Store our products out of direct sunlight: UV exposure can degrade plastics and make them brittle.
- During winter months it is preferable to store containers inside and at a temperature above 10°C before using them. Plastics become brittle under negative temperatures. This characteristics is reversible when temperature rises again.

### Bio-sourced material :

Bio-sourced material are sensitive to changes in temperature and level of hygrometry. In order to avoid deformations and destacking problems, we recommend to use the products shortly upon receiving them and to store them inside in a cool and dry place. We will not be able to take back goods that have been damaged by improper or extended storage.

# MARKETING SOLUTIONS

## ► Customization

Today, the container is no longer just a growing support. It becomes a way to create value and to stimulate the act of purchase. For these reasons, we offer **a complete range of Marketing Solutions** which enable to improve the visibility of the products and enhance the productions.

- **Ready-to-go products** (Carrying handle: p. 14)
- **Promotion products** (PM2+: p. 19)
- **Ready-to-use products** (deco containers, window boxes, hanging baskets and bowls: p. 57-59, 66-71, 72-75, 76-79)
- **Customization** (labels, printing, colour, label stakes: p 10 to 15).

## Products labelling

Simple black printing on white label or CMYK customized label printing, we adjust our labelling solutions to your needs. We **are equipped to label all of our containers** (injected pots or thermoformed pots) with labels developed according to your imagery or your needs (barcode, QR code, logo, etc.):

- Waterproof and UV proof label
- Black or coloured printing on a white background
- Standard size: 24 x 40 mm (Other sizes available, please ask us)

## Colours

Our colour range allows you to make many associations between the container and the plant. It's one of the easiest way to enhance your productions. We keep a close eye on the new colour trends and we work with recognized trend agencies. We offer the largest off-the-shelf colour range of the market and a great flexibility to develop bespoke colours.

**REACH REGULATION  
ALL THE PIGMENTS  
WE USE COMPLY  
WITH THE REACH  
REGULATION.**

## ► The attachment system

Bedding trays and several Soparco containers are provided with an attachment system. You can easily place labels, carrying handles and label stakes in order to set up your marketing solutions. The Soparco labelling system is explained below:

**C : Clip**

Curved slots  
at the end of the bedding  
plant trays.

**G : Slot with teeth**

Slot with 8 mm  
teeth and more.  
The 4 teeth are inside  
the box.

**G2 : Slot with teeth**

Slot  
with 7 mm  
teeth  
and less.

**F : Slot box**

The curved slot  
is placed in the bottom  
of the slot box.

## ► Customization

### PRINTING

For those who wish to customize their pots, printing is a **really efficient marketing tool**. Today, we are able to meet your expectations thanks to different printing processes. Our sales team will advise you on the best method according to your needs.

### Flexography printing

This process enables to make a **CYMK printing with a photographic quality**. This technique **consumes little ink** and is **therefore environmentally-friendly** while offering a **great quality rendering**.

- Printing fees : personalised quote on demand.
- Delivery time : Please ask us for lead time.
- 300 dpi .eps or .pdf files are required.
- If our contribution is necessary, the time spent will be charged additionally.

### Offset printing

This printing process gives **quality results** with a very **precise print frame** and a **durable** print. We can print 1 to 4 colours:

- Printing fees : personalised quote on demand.
- Delivery time : Please ask us for lead time.
- 300 dpi .eps or .pdf files are required.
- If our contribution is necessary, the time spent will be charged additionally.

## IML printing (In-Mould Labelling)

With this technology, a pre-printed polypropylene label is placed inside the mould before injecting the material. Label and container become one.

The advantages of this process are numerous:

- High-quality print.
- Unlimited choice of colours.
- Possibility to print « square-round » pots including in the label slot recess.
- Ecological solution: Container and label consist of the same material (polypropylene) and can therefore be fully recycled.

Different products can be printed. Contact us for any request.

Required files: 400 dpi (minimum 300 dpi) in .eps, .ai or .pdf format with vectorized texts and logos.

Please contact us for price and delivery time.

## Silkscreen printing

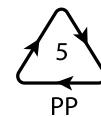

High **quality printing** on injected round or square pots.  
Contact us for any request.

## BIO THERMOFORMED RANGE:

Soparco's natural "range of thermoformed containers are manufactured using biodegradable" materials. Due to a minimal carbon footprint the production of this range lends itself to optimised sustainable development. The materials used are biologically compostable, according to the EN-13432 Norm, as certified by TÜV. The production process of these containers has been designed and tested in house. This range is compatible for use in existing irrigation and production systems designed for use with conventional plastic containers. (Do not plant with pot)

*Bio-sourced material are sensitive to changes in temperature and level of hygrometry. In order to avoid deformations and destacking problems, we recommend to use the products shortly upon receiving them and to store them inside in a cool and dry place. We will not be able to take back goods that have been damaged by improper or extended storage.*

### DUO® BIO FIBRA 5° LOW

5010

Code	Designation	No. of cells				Ø of cells (cm)	Associated pushout trays	01	
5010	Reusable plug tray 8 x 13 cells	104	50,0 x 33,0 x 4,0	23 cc		3,2	5011		30 / 20

5015

Code	Designation	No. of cells				Ø of cells (cm)	Associated pushout trays	01	
5015	Reusable plug tray 10 x 15 cells	150	50,0 x 33,0 x 4,0	17 cc		2,8	5016		40 / 20

5026

Code	Designation	No. of cells				Ø of cells (cm)	Associated pushout trays	01	
5026	Reusable plug tray 13 x 20 cells	260	50,0 x 33,0 x 3,7	9 cc		2,2	5027		45 / 12

# TRAYS (Tray for bedding trays page 23)

## POT SUPPORT TRAY

Reusable tray

Code	Designation	No. of cells		Bottom Ø of cells (cm)	01		
4824	12 pots 17/20 cm	12		112,5 x 78,0 x 12,6	16,2		75

## REUSABLE TRAYS

Code	Designation		No. of trays / m²	01			
4820	8 pots of 14 cm 8° or 13 cm 5°		52,5 x 30,5 x 3,5	6,2		25 / 28	700

For liner

7 x 7 x 6,2 | Ref 4612  
7 x 7 x 6,4 | Ref 2100  
7,5 x 7 | Ref 4665

Code	Designation		No. of trays / m²	01			
4821	24 pots of 7x7 cm		44,0 x 28,0 x 1,8	8,12		25 / 30	

For liner

7,3 x 7,3 x 8 | Ref 4657  
8 x 8 x 7 | Ref 4670 / 2101  
8 x 8 x 8 | Ref 4677  
For pot  
0,3 LV | Ref 2219  
0,37 LV | Ref 2221  
8 x 8 x 9 CS | Ref 5121 / 5125

Code	Designation		No. of trays / m²	01			
4822	24 pots of 8x8 cm		50,0 x 32,0 x 1,8	6,25		25 / 30	

For liner

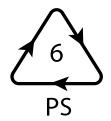

9 x 9 x 8 | Ref 4688  
9 x 9 x 9,5 | Ref 4690

For thermoformed Duo  
Ø 9 cm 5° low | Ref 4412

For pot  
0,37 LV | Ref 2221  
0,5 LV | Ref 2233 / 2236  
8 x 8 x 9 CS | Ref 5121 / 5125  
9 x 9 x 10 CS | Ref 5131 / 5133

Code	Designation		No. of trays / m²	01			
4823	15 pots of 9x9 cm		47,0 x 28,0 x 1,8	7,8		25 / 30	750

## 11 TRAYS per CC shelf

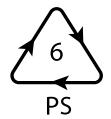

- Possible combination with trays 8748 - 8749

Code	Designation	Configuration	Bottom holes on mesh base	01		
8700	5 pots 11x11 GM FA			56,0 x 11,3 x 6,2		35 / 72 2 520

(Also look at the "limited stock" book at the end of the catalogue)

## 10 TRAYS per CC shelf

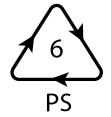

- 2 levels for logistic gains on CC shelf (up to 50 pots per CC shelf)

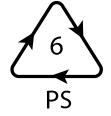

Code	Designation	Configuration	Bottom holes on mesh base	01		
8706	5 pots 12x12 FA			57,0 x 12,0 x 8,2		32 / 68 2 176
8707	5 pots 12x12 RE			57,0 x 12,0 x 8,2		32 / 68 2 176

## 8 TRAYS per CC shelf

Code	Designation	Configuration	Bottom holes on mesh base	01		
8738	4 pots 14x14 FA HW			28 x 28 x 6,8		40 / 64 2 560

## 7 TRAYS per CC shelf

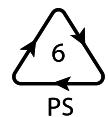

Code	Designation	Configuration	Bottom holes on mesh base	01		
4566	12 pots 9x9 FA			56,0 x 18,5 x 5,0		80 / 24

Code	Designation	Configuration	Bottom holes on mesh base	01		
4594	12 pots of 9x9 shuttle model			56,0 x 18,5 x 10,0		60 / 24

# CONTAINERS

## ► Round form

### SX: A GLOBAL SOLUTION FOR ALL YOUR PRODUCTS

#### AN « ECO-FRIENDLY » CONTAINER

The innovative research and highly technical manufacture of the SX container highlight the eco responsible SOPARCO policy by:

- The reduction of material weight while maintaining good mechanical characteristics.
- The use of presses with low energy consumption for manufacturing.
- The use of fully recycled materials during the production of black and Terracotta colours.
- High opacity for optimal root growth.
- Minimal carbon footprint.

#### THE ART OF DETAIL

##### 3 Levels bottom:

- Geometry of the bottom providing a perfect substrate aeration.
- 25 evenly distributed holes in order to ensure an optimal drainage.
- Improved drainage due to star-shaped drainage system.
- Central post, facilitates a steady bottom and optimal drainage.

- The rim are studied for a maximal rigidity.
- Excellent de-stacking.

- New generation of G2 label slots : Fixing system developed for a perfect fixing of the labels, carrying handles...
- Ease and reliability of the fork lifting automation.
